PROBLEM OF WASTE

www.worldbank.org

ACORDING TO WORLD BANK

Since 2004, there has been a doubling of waste in Lao PDR about 910.000 tonnes are generated each year; this is expected to rise to 1.4 million tonnes by 2035

- 91.000.000\$ to 140.000.000\$

DESTROY THE WASTE

Burning

Landfill

THE TWO LARGEST TYPES OF WASTE:

50 percent of the waste generated in Laos PDR comes from Organic materials and the next largest type of waste is plastic which varies between 16% to 24%

CAUSES

CARELESSLY

**NOT
SEPARATE WASTE**

**LACK OF
AWARENESS**

NOW SOLUTION

Our Solution

5 IMPACT OF SEPARATE MACHINE

REDUCE WASTE

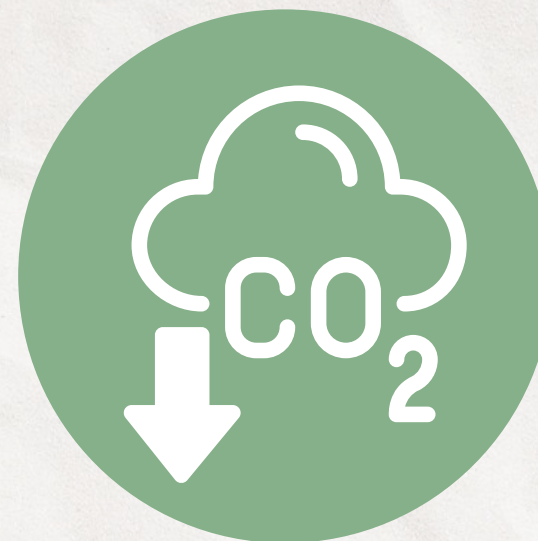

**CONSERVE NATURAL
RESOURCES**

SAVE COST

CREATE VALUE

DECREASE POLLUTION
